Desk layout sketch

Analyzed

Captured 09:28 · Document + diagram · 1 page

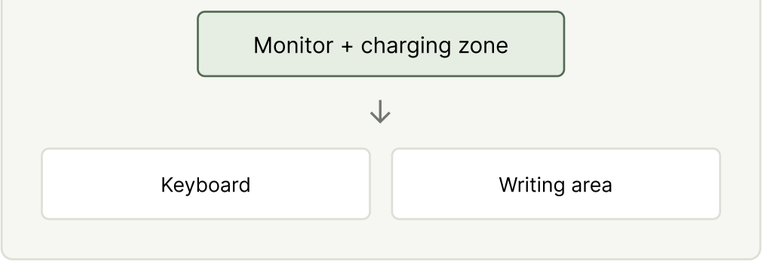

Summary | Extracted text | Diagram

A quieter, more flexible desk

The sketch proposes a centered monitor, an open writing area on the right, and a charging zone behind the monitor. Three callouts were found.

01 Monitor arm clears the surface
02 Keep a 30 cm writing zone
03 Route cables along the rear edge

Diagram interpretation

Check measurements against the original. Handwritten text may be misread.

Morning notes

Tuesday, 13 October 2026

The goal isn't a perfect desk. It's a space that makes starting feel easier, and gives me fewer reasons to switch context.

What I want to change

- [ ] Clear the area under the monitor.
- [ ] Keep a dedicated space for handwriting.
- [ ] Make charging less visible, but easy to reach.

For the review

Ask Maya about the monitor arm clearance. Compare the sketch with the actual desk measurements before ordering anything.

↗ Desk layout sketch

What measurements matter for the monitor arm?

Ask your knowledge

From your workspace

Your notes list three dimensions to check: the desk's 24 mm edge thickness, 80 mm of clearance behind the monitor, and the display's 100 × 100 mm VESA mount. Confirm the arm's clamp range before ordering.

Sensors clear · Movement ready

A clear morning for the things that matter.

Your design review is at 11:00. Take a little time for Desk refresh before the day gets busy.

Help me make space for focused work before my design review.

Still

You have a clear window until 11:00. Let's make room for one important thing:

Deep work · Desk refresh
10:00–10:45 · Review desk layout
Needs your approval

Nothing will be added to your calendar until you approve it.
